Klik Black
Lighting Connection

Klik Black
Hide in plain sight

Being the market leader for plug and play lighting connection, Klik can be seen in may buildings throughout the UK. Listening to our customers, we often receive requests to minimise the visibility of the lighting connection and control systems in open ceiling applications.

We are introducing Klik Black, to deliver a low visibility solution, allowing the lighting connection system of a building to hide in plain sight. This gives an even wider application range to installers and building managers.

Ceiling Rose
The 6A plug-in ceiling rose is used to offer a pluggable connection for lluminaires.

Marshalling Box
As part of the Klik 4 range, the mashalling box enables luminaires cables to be plugged-in on or off load.

3 Pin Plug
All Klik plugs feature a unique plug-in method which achieves a simultaneous mechanical and electrical connection.

Presence Detector
Our range of occupancy sensors can provide presence and absence control of lighting, providing energy savings on the usage of the room.
