

Protect your valuable electronic equipment this storm season

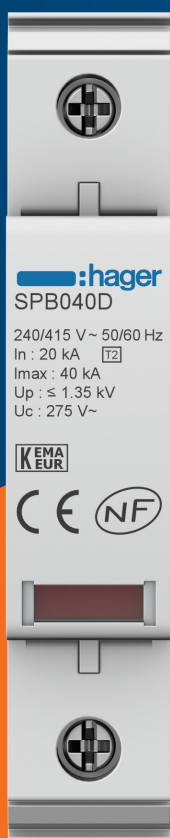

Your new dream home contains a large range of valuable electronic devices such as TV's, home theatre, hi-fi systems, computers, gaming consoles, dishwasher, solar inverters & EV Chargers. All of which are susceptible to electrical spikes and surges.

Ask yourself...

What is the total value of all your electrical appliances?
Are you willing to take the risk of losing it all?

It is a wise investment to protect your valuable electronic equipment with a Hager Surge Protection Solution. With the cost of replacement running into thousands of dollars, prevention is better than a cure.

For more information,
contact your local licensed electrician.

Your choice of upgrades

From direct lightning or transient overvoltage, storms can cause anything from the premature aging of your valuable electrical equipment and downtime, to the complete destruction of electronic components and materials. Installing surge protection devices in your switchboard will stop any unwanted surges or spikes and protect your home.

Surge or surge & lightning protection can protect the following:

Lighting Systems

Security & Alarms

Kitchen Appliances

Computer & Entertainment Systems

EV Charging Systems

Solar Inverters

Lightning Protection

Surge Protection Devices
