Sollysta Wiring Accessories

Our expansive range of Sollysta Wiring Accessories have been designed from the beginning to be installer friendly, tactile & safe.

Sollysta Wiring Accessories Ip66

Manufactured from a tough, durable thermoplastic, the IP66 range is ideal for applications where wiring accessories may be vulnerable to potentially harmful effects of dust and water ingress.
The IP66 rating assures total protection and is robust and a durable solution for indoor or outdoor applications.

Moulded Plugs
Extended enclosure for extra wide gel seal means even moulded on plugs can be accommodated.

Secure
A Padlock of up to 5mm diameter shank can be fitted to the enclosure to prevent unauthorised use.

180 Degrees
A unique dual action hinge allowing the lid to be opened a full 180 degrees for ease of plug insertion and switch operation.

Soft Sealing
The factory fitted soft gel seal fits snugly around power cables to maintain the IP66 rating in use with the lid fully closed.
