New worlds
of pleasure.

AC by Marriott Wrocław

Poland

The AC Hotel by Marriott Wrocław is located opposite the National Music Forum. Form and functionality of the house create a revolutionary hotel experience. Since the conversion, the safe of the original bank building has become a unique place for modern meeting culture. Other special features include the floral staged, large outdoor patio with a bookable barbeque banquet run by the star chefs of the in-house Fuego restaurant.

A difference you can feel.

Hotel Card switches

Electronic hotel card switch, consisting of insert and cover with integrated LED lighting. Adjustable switch-off delay up to 1 minute via potential-free switching contact. Disassembly protection via screw fastening.

USB/HDMI slot

3 Amp power for smartphones and tablets.

KNX visualization

Controls light, shade, media technology and room air conditioning using incredibly convenient PMS systems (KNX).

Modular devices

The fire protection switch (AFFD) detects serial and parallel fault arcs and switches off the affected circuit in less than a second.

volta

Whether as a surface-mounted, flush-mounted or cavity wall variant, the volta small distribution board is available for every application. It offers up to 60 space units and still has plenty of wiring space.

unimes H

unimes H is the system for all switchgear and control system manufacturers. It is characterized by a high degree of intrinsic value creation and a high standard of safety thanks to designs 1–4 and an active ambient light protection system and a High current carrying capacity from 800 – 4000 A.

25hours Hotel Paris

France

The 25hours Hotel Terminus Nord presents itself as diverse as the inhabitants of the 10th district where it's located. It offers the urban explorer a pleasant retreat and reflects the cultural diversity of its neighborhood in every detail. Working closely with local heroes, design agencies and restaurants, this has been more than just a hotel. At the end of every sightseeing tour it's like coming home. Welcome to Paris!

25hours Hotel Paris

Solutions that simply fit.

berker serie 1930

The 1930 series is strongly inspired by the Bauhaus movement. It is the ideal combination of classic and modern, offering three finishes (Rosenthal porcelain, classic and glass).

gallery

Simple, high-tech and featuring a state-of-the-art design, the 28 models in the gallery range offer the perfect lighting for your spaces.

Manufaktur

Our ranges of wall fittings are all customisable, which means you can tailor them to suit the style of your hotel.

witty.park

Charging station available as a single or double charging point, wall-mounted or with base, free or paid. Ideal for electric vehicles, for both your own and your customers.

Supply unit

Round, square or rectangular, they can be used in your meeting rooms to discreetly route high and low current connections as close as possible to users.

KNX Solutions

Set the lighting, ambiances, multimedia equipment and air conditioning using a single interface with open and scalable KNX solutions.

Creating
relaxation
and appreci-
ation at
the highest
level.

As far as quality of life is concerned, the Hotel Andaz München Schwabinger Tor, more than meets the high standards of the bavarian capital. This luxury hotel provides several attractions in Munich including skybar, star cuisine and wellness pamper spa. To experience this pleasure with all your senses is the house's silent promise.

Individuality at the highest level.

berker serie 1930

The series is a classic of interior design and has had a lasting influence on switch design. The origins of the series go back to the 1930s. The porcelain version is produced in cooperation with Rosenthal, the most artistic porcelain brand in Germany.

berker serie R.classic

Aside from the point and the straight line, the circle represents one of the oldest elements of geometry. And yet, it never ceases to surprise. Such as in the form of the R.classic design line. This is as pure and elegant as it is intense and unmistakable. The vast number of inserts from the serie R make the implementation of individual customer requests a reality.

berker serie R.classic

A switch that evokes memories and emotions. The berker serie R.classic stylishly brings together a classic design language with high-quality materials. The solitary arranged elements notably accentuate the individual design line of the serie R.classic.

berker Q.3

Why install a conventional socket outlet with earthing contact when you can also combine the 230 V socket outlet with USB charging connections? This way you can supply power to smart-phones, tablets, etc., in a simple and stylish way.

berker 1930 Rotary switch, gold illuminated

The illuminated switch design series 1930 sets highlights and convinces in high-class lifestyle hotels all along the line. The highlight of the new illuminated design lines are the LED module and specially developed light guides. These create a discreet glow around the rotary knob, which functions either as an orientation or status light. The innovative light guides provide elegant design accents in the interior and technically assumes the centering function for the cover plate.

R1.SL LED Band

The indirect lighting of the tehalit.SL LED ensures that guests can quickly find their way around, and skilfully sets the room scene. The LED strip of the skirting trunking tehalit.SL LED provides indirect light – with a motion detector for only when it's actually needed. The tehalit.SL LED is both extremely practical and very decorative. Its high-quality material and aluminium or anthracite colours provide for a modern and attractive appearance.

Prominent building in the city of Weert.

Antje van de Statie Weert

Netherlands

The brasserie-style hotel Antje van de Statie has a restored façade and characterizes the cityscape while the rooms have the most modern design. The brasserie, with entrance opposite the station, promises the best coffee, and French flair cuisine with hospitable service, in accordance to the ideas of Maria Hubertina Hendrix.

Antje van de Statie Weert

A difference you can feel.

tehalit.SL LED Band

In a variety of different colours and styles, skirtings can be combined with various electrical inserts. The led lighting creates a good solution for night lighting.

Manufaktur switches

In this hotel a special colour and finishing was created for the berker R.1 switches, so they would match the interior perfectly.

berker R.1

The berker R.1 has a timeless design. The variety of materials and colours provide a great addition to every room.

univers N

The proven interior installation system univers N has been further developed into a true professional system up to 1600 A. This means that individual distributions can be implemented even faster, even easier and even safer.

domovea automation

KNX visualization: Control light, shade, media technology and room air conditioning using incredibly convenient building automation system (KNX).

Energy metering

With the energy meter ECA300C you get insights in the power usage of your building. It helps you save energy.

**A new
idea of
community.**

At Six Stockholm

Sweden

An old bank office in the neighbourhood next to Brunkebergstorg was transformed into what we now call **At Six**. An elegant and distinctive hotel created by a strong vision and bold ideas.

**At Six
Stockholm**

Solutions that simply fit.

berker serie 1930

The number one among rotary switches – then as now: the design language is directly based on that of the historic Berker Bauhaus switches. The range is made either of shiny plastic in black or white, or of fine porcelain “made by Rosenthal”.

USB charging socket with 2 USB

Type A for charging mobile devices such as tablets, smartphones, navigation devices and digital cameras via USB cable, short-circuit and overload-proof (electronic fuse).

berker Q.1

The berker Q.1 series are switches you can feel. From the very first touch you can feel the unmistakable velvety texture. The frames of the Q.1 series are gently rounded and have a very harmonious appearance. In contrast, the frames of the Q.3 series are straight and angular. The timeless polar white and anthracite colours fit into every modern living environment. With their functional design, the 1930 and Q.1 series create a special environment. A perfect combination of innovative technology and timeless design.

Relay switch with centre plate for Hotelcard

Relay switch with centre plate for Hotelcard R.1/R.3 black, glossy Hotelcard with potentiometer for step-wise adjustment of the follow-up time, illuminated with blue LED when the hotelcard is not inserted, with potential-free contact.

berker Q.3

Hotelcard switch, USB, HDMI and International outlets in 15 different design series in 240 different combinations. You can also choose your own colour or surface to match the interior of the hotel. berker Q.3 is the perfect choice of creative technology and timeless design.

We reduce operating costs.

We develop interconnected, and energy-efficient concepts that integrate all room functions.

This means that your energy consumption can be centrally controlled, measured and visualised. As a result, you can quickly identify expensive consumption peaks, unexpected limit value overruns and operating conditions that deviate from the ideal, showing you where energy consumption can be optimised and costs saved.

Do Not Disturb

The Do Not Disturb / Make Up Room switch ensures that guests' wishes are easily understood by staff, and a good communication between guest and staff optimises the hotel workflow.

The Do Not Disturb / Make Up Room switches come from our own manufacturing, where they are individually designed and produced for each hotel. This ensures that they blend harmoniously into the interior design of the building and ensure that guests and staff can communicate effortlessly, from the moment the guest arrives.

We give you the freedom to grow whatever happens.

Whether it's a change in the equipment of a hotel room or the renovation of the entire building: Our cable management solutions deliver power and data wherever they are needed – today and well into the future, thanks to their high extensibility and adaptability. This allows operators to react flexibly to changes at any time and to adapt room concepts to their wishes.

A place
where
work and
atmosphere
create a
perfect
symbiosis.

Mezzo Hotel Beringen

Belgium

The Mezzo Hotel in Beringen, Belgium, is designed for business travellers. Availability of offices and meeting rooms combined with the possibility to stay overnight increases productivity. In addition to direct access to main roads, Mezzo also offers long-term solutions for commuters and companies. When it comes to business, the mix of relaxation and concentration is guaranteed.

Mezzo Hotel Beringen

Berker S.1

The S.1 series stands for “standard”, in terms of modesty, functionality and timelessness. The hotel is fully equipped with the S.1 range, which includes all the functions a hotel needs to offer maximum comfort to its guests. The card switch ensures that lighting is automatically switched off in case of absence.

Individuality at the highest level.

berker serie 1930

The series is an interior design classic that has had a lasting influence on switch design. The origins of the 1930 series go back to the 1930s. The porcelain variant is produced in collaboration with Rosenthal, Germany's most artistic porcelain brand.

tehalit.SL

The Skirtings SL are available in a variety of different colors and styles. skirtings can be combined with various electrical inserts.

Smoke and heat detector

The optical smoke and heat detector TG550A is equipped with a double optical and thermal technology. In addition to optical detection, heat detection is activated when the ambient temperature rises abnormally or when the ambient temperature reaches a value between 54 and 70 °C.

Presence detector

The presence detector enables energy-saving in a hotel. It ensures that lighting is automatically switched off in the absence of guests or staff or when the room is sufficiently bright without electrical lighting.

KNX technology

With the tebis system you are able to control all the electrical functions of the installation (lighting, shutters, heating). The KNX technology guarantees the durability and interoperability of your creations.

Cabinets and protection devices

A full range of robust and aesthetic enclosures for the realization of a complete electrical distribution up to 1600 A: cabinets, main switchgear and modular devices.

Experience
relaxation
here with
ease.

Sorli Emocions Barcelona

Spain

Since its inception, Sorli Emocions has been setting new standards in the hotel industry and not just in its design language.

The modern hotel where you can feel the full magic of the Mediterranean; work and meet with colleagues or clients, or simply enjoy a romantic break under the Maresme sun. Forget routine and enjoy a stay at the best kept secret on the Barcelona coast.

A difference you can feel.

berker R.3

Angular design, round central pieces: berker R.3 expertly plays with contrasts.

KNX

Control light, shade, media technology and room air conditioning, IoT devices ... everything is possible with the KNX devices by Hager.

berker TS sensor

Among the berker R series, berker KNX touch sensor combines angular and soft shapes with elegant glass surfaces in black and polar white.

h3+/P630

The new generation of Hager moulded case circuit breakers combines a reliable protection with an accurate integrated energy monitoring, together with agardio.manager.

quadro4, quadro5, quadro+

quadro+, the proven solution that assures security, performance and reliability. Certified smart robustness in enclosures up to 4.000A.

agardio.manager

The difference between guessing and knowing, agardio.manager is the right and simplest solution for smart energy monitoring at your hotel.

**Make a
stay unfor-
gettable.**

Radisson Blu Reussen Andermatt

Switzerland

1444m above sea level, the Radisson Blu Hotel Reussen, Andermatt, forms its own summit to the mountain massifs of the Swiss Alps. Inside and out, the exquisite location offers a pleasurable ambience and ensures a deluxe feel-good factor: Highest demands combined with deep relaxation.

Radisson Blu Reussen Andermatt

Solutions that simply fit.

Do Not Disturb / Make Up Room switch

The Do Not Disturb / Make Up Room switch ensures that guests' wishes are easily understood by staff, a good communication between guest and staff and optimizes the hotel workflow. The imprinted symbol is not visible in switched off state of the signal light.

USB charging sockets

For convenient charging of smart-phones, tablets, digital cameras and smart watches, use the practical USB charging sockets – for use instead of conventional sockets, thanks to the new USB charging sockets in the popular designs kallysto.art, kallysto.trend and kallysto.pro.

univers N

We are constantly developing our proven interior installation system univers N further – so that electrical installers and switchgear manufacturers can install individual distribution boards even faster, even easier and even safer. With the robust quality of all components and installation-friendly handling, we make it really easy for you. And of course reliability is not neglected either.

quickConnect

quickConnect combines speed with security. Security is very important these days while time is often neglected. That is why we have developed a few ingenious assembly aids that combine maximum protection with high speed.

Floor socket

Here the energy is hidden: The high-quality stainless steel floor boxes from Hager guarantee flexible interior design: Cable clutter and tripping hazards caused by unnecessary extension cables are elegantly avoided.

Redefining Russian hospitality.

Pentahotel Moscow

Russia

Right in the heart of Moscow, the Pentahotel, Arbat is the perfect location to explore the urban Moscow life: partying, shopping and the sight-seeing of all major city landmarks are all within walking distance. Excellent Russian cuisine provides plenty of energy for an in-house gym workout. Those who explore Moscow will find an air-conditioned home with a stylish ambience at the Pentahotel when they return.

Pentahotel Moscow, Arbat

Penta Hotel Moskau

Pentahotel Moscow, Arbat is located in one of the city's landmark buildings – The Book – on Novy Arbat Avenue, the famed fashion district, adjacent to Moscow's prime attractions including Pushkin Museum, Saint Basil's Cathedral and the iconic Red Square. It is a new home to sightseeing travelers and is equipped with 228 rooms over 6 floors, polished in its branded design concept.

Individuality at the highest level.

berker Q.3

On one hand, there is the berker Q.3 clear contour, and on another its user-friendly surface. It is equipped with the same center plates as its sister program berker Q.1. Its functional benefits are also noteworthy: the berker Motele is ideally suited to wall duct installations.

berker Q.3 hotelcard switch

You notice the difference the first time you touch it: thanks to its innovative surface, this likable allrounder has an unmistakable velvety feel – in elegant anthracite and now in an additional attractive colour variant.

berker Q.3 USB sockets

Mobile phones, digital devices and games consoles are now a fixed part of everyday life. In the same way, a Berker USB charging socket is a part of any hotel room. They can be used to recharge the batteries of many mobile terminals with USB connections.

berker serie 1930

Berker and Bauhaus are not only the same age (both were founded in 1919), but they also share the same passion for pure shapes and functionality. Even today, designers and planners love both qualities. And because of this, the unique Bauhaus-inspired berker serie 1930 can be found not only in timelessly classic buildings, but also in trendy properties such as the Pentahotel in Moscow.

berker serie 1930

Available in plastic polar white or plastic black.

LED-signal light, white lighting

Switchable via a separate switch. For signaling notices, information or warnings.

**A homage
to antiquity.**

The Museum Hotel Antakya

Turkey

The Museum Hotel Antakya is located near St. Peter's Church on Starius Mountain in Antakya/Hatay. It offers 200 rooms and with mosaics, baths and squares. The house combines the different layers of civilizations, which were settled during excavations. The function of the hotel and integrates modern technologies with more traditional materials in the interiors.

The Museum Hotel Antakya

The Museum Hotel Antakya

The Museum Hotel Antakya provides a rich history of ancient heritage. It was built over the largest Roman Empire mosaic ever discovered. Travelers can experience over 2,300 years of history up close at this luxurious hotel.

A difference you can feel.

IP Control KNX

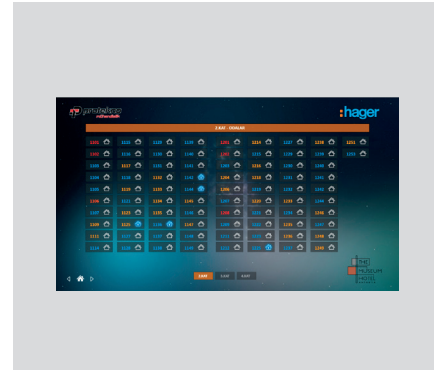

The 75710004 IP controller, central operating and visualisation unit via web browser for KNX/KNX, KNX server for supplying max.50 visualisation clients with KNX/KNX data, support of common web browsers, also usable with Apple. Freely configurable graphical user interface for display on the PC screen, integrated element library with standard operating elements, up to 20 operating configurations for different applications.

Presence detector 360°

The TCC530E presence detector multi-channel with integrated bus coupler and with two independent zone detectors for ceiling installation for brightness and motion-dependent switching. The presence detector also enables control of the KNX dimmers or the KNX /Dali interfaces via an object for further lighting regulation.

DALI Gateway

Hager's KNX / DALI Gateway complies with the highest standard currently available in LED lighting control. In combination with a TCC530E presence detector, re-duction of the light intensity when no movement is detected. The hotel management is controlling around 5.500 DALI products for common areas and visualizes room lighting system with IP Control.

Fig. Presence and motion detectors enable energy-saving lighting design in a hotel. They ensure that lighting is automatically switched off in the absence of guests or staff or when the room is sufficiently bright without electrical lighting. In this way, they contribute to ...

- ... improving energy efficiency
- ... lowering operating costs and
- ... reducing CO₂ emissions.

Did you know?

Aside from guest rooms, public areas such as restaurants, bars and spas are a frequently underestimated source of potential energy savings.

We develop interconnected, and energy-efficient concepts that integrate all room functions.

A place where guests feel at home.

When it comes to the electrical infrastructure of a hotel room, we are experts in providing guests with an extraordinary experience. Because with us they can feel absolutely safe.

**“Hager solutions
fit perfectly into
the language of
modern design
thanks to their
variety and classic,
timeless design”**

Fig.
berker Q.3
Design

Swipe, click, feel good.

The KNX room controller can regulate both the room temperature and ventilation, depending on the user's preferences. Individual welcome scenarios and various recallable room scenarios can also be selected here – whatever makes your guests feel most comfortable.

Werner Aisslinger, Interior Designer
Bikini Hotel Berlin und Hobo Boutique Hotel Stockholm

“A hotel room is like a place where you come home. You should feel familiar with the room and the interior, but also with the technical functions.”

Designs that add the finishing touch to every room.

The variety of switches and building control systems in the berker portfolio provide a unique selection of 240 different products in 15 design collections, from classic to contemporary.

To find out which products and solutions best fit their ideas, we provide creative minds with a toolbox of samples, references and catalogues.

Set your spirit free with cutting edge technology.

We harmonize our products and services to align with the latest reliable technology, which enables us to provide outstanding customer experiences. We put a strong emphasis on quality to help future-proof our products and ensure that they function at an optimal level for as long as possible.

When solutions fit your design expectations perfectly.

Whether classic, modern classic or contemporary, our designs offer an unprecedented variety of shapes and a wide range of finishes, materials and colours; enabling individual solutions for every architectural concept and giving rooms a personal touch.

01 Room solutions

From switching lights on and off remotely to adjusting the ambient lighting of each individual space, or automatically opening and closing rollers, shutters and blinds, a modern room control system can not only be operated intuitively – it can also adapt perfectly to the customer's preferences and create an atmosphere in which they can live and work well.

In this regard, our room management solutions set high standards. Switches, sockets and sensors not only combine sophisticated technology with a unique design, they also leave nothing to be desired in terms of comfort, mobility and safety, while at the same time optimising space allocation and costs.

02 Cable Management

Our cable management solutions deliver energy and data wherever they are needed in hotels, offices and retail stores. Whether along floor, wall or ceiling – they offer flexibility to every type of building, every workplace and every desired application. All this throughout the entire life-cycle of a building and in full harmony with its design, since our solutions adapt flexibly to the needs and requirements of different user groups. Therefore, the property remains attractive over many years.

03 Energy Management

The energy efficiency of the electrical system is something no planner can ignore. This is ensured by the DIN VDE 0100-801* standard published in October 2015, which describes the requirements for an energy-efficient electrical installation. If our customers want to work in compliance with industry standards, they should definitely get to know our energy monitoring system agardio. Energy guzzlers can be exposed quickly and operating costs can be reduced by changing consumer behaviour – without compromising on service quality, personal safety or security of supply.

The result is an energy efficiency class for the entire electrical system – the EIEC 0 to 4.

04 Energy Distribution

Energy distribution solutions are developed with the needs of the panel builder and end user in mind while meeting international design verification standards. Energy distribution boards can be adapted based on customer needs to different levels of safety protection and asset requirements. Designed accordingly, system expansions may be realized without switching off critical power in commercial applications.

A world of customised solutions.

The change is obvious. Individualisation has long been a mega-trend in all areas of our lives, and this has also found its way into the hotel industry. A hotel conveys a sense of life and relies on the independence and originality of its design and conceptualisation. It is an expression of the owner's own personality and good taste. Above all, customised solutions such as tailor-made design have turned out to be a key success factor. In order to stand out in the market, traditional standards must be thrown overboard in favour of unusual ideas that excite guests.

The only limit is your imagination.

Hager Manufaktur takes all this into account and makes a decisive contribution towards turning a hotel into a unique place. Our manufacturing combines resources and know-how from our Hager, Berker and Elcom brands to create complete solutions that meet every requirement. From individually configured packages from our existing product ranges, to the modification of individual products, and to the in-house development of unique products that are carefully manufactured by hand. The possibilities are almost endless, encompassing the entire spectrum of modern electrical installations. It's all coming together. Everything is from a single source. Optically and technically. Consistently high quality. No breaks, no compromises.

Never has the longing for personal expression been stronger, never have the possibilities been greater. A desire that is particularly reflected in the world of personal living spaces.

Erwin van Handenhoven,
Hager Group Design Director

**“The manufacture
creates a creative
framework within
which the planner
can move freely.”**

**Erwin van
Handenhoven
gives products
a unique look.**

**Turn a hotel
into a sustainable
investment.**

A hotel should create added value over the years. This is why Hager offers custom-fit, upgradeable solutions that suit tomorrow's lifestyle spaces.

Keep your property attractive just like the very first day.

In terms of design, use, comfort and regulations, our products not only meet current needs but also adapt flexibly to all future requirements.

Standardized interfaces enable fast implementation, while guaranteeing compatibility and potential for expansion. In this way, hotels are able to offer their guests a unique customer experience, both now and in the future.

As a trustworthy and responsible partner we are always at your side.

We accompany your hotel project from beginning to end. We support and advise you in your daily business and with any questions about electrotechnical planning thanks to our extensive experience and specialist knowledge.

We are your partner.

Because we know that business is done between people, being close to our customers is one of our most important corporate values. And that is exactly why you will not be assisted by just anyone, but by your personal contact. He understands what you need and exchanges ideas with our specialists when necessary. This enables him to offer you products and solutions that meet your requirements and provide real added value.

We accompany you through all phases of your project. And make sure that our offers not only fit your specifications perfectly, but are also future-proof. The solutions offered are consistent and scalable and thus simplify the implementation of changes in the planning process.

bimobject®

Hager BIM objects help you to make digital 3D planning of new buildings transparent and much more efficient. In our database, underfloor systems and dado trunking systems are available digitally as BIM objects in the Revit and ArchiCAD file formats. The objects can be easily imported into common BIM programs. Our underfloor and dado trunking systems are also available in the BIM data portal, BIMobject, which is available across manufacturers. You save time, remain competitive and increase quality as a result.

All of Hager's BIM objects are listed at hager.de/bim and bimobject.com/hager-group

:hager

Hager represents simplicity and safety in all aspects of electrical installation in residential and functional buildings.
