At A Glance

Klik 4 Lighting Connection

Klik is our secure lighting connection and control system that brings plug-in convenience and versatility to lighting.

Safe on-load connection

Luminaires can be connected in seconds in absolute safety, without circuit isolation as all live contacts are inaccessible and the earth connection is made before any other, facilitating a simplified maintenance plan.

Easier

The Klik 4 range is designed to make installation easier on installers. The terminals are large with raised identification making them simpler for wiring. Cable ends are prepared with crimps making installation even quicker.

Occupancy Sensing

Our range of occupancy sensors can provide presence and absence control of lighting, providing energy savings by switching lights on or off depending on the usage of the room.

Electro Mechanical Connection

All Klik plugs feature a unique plug-in method which achieves a simultaneous mechanical and electrical connection.

The Range

It's unique modular plug and socket interface provides a simultaneous mechanical and electrical connection in one easy, click-in action.
