Sollysta Wiring Accessories

Sollysta offers a complete range of wiring solutions for any application with our White Moulded, Decorative, Grid, IP66 and Metaclad ranges.

Specifically designed to inspire confidence, the modern design combines stylish aesthetics and quality without compromising on functionality, reliability or safety.

All of the hallmark features run consistently throughout the range, including the unique neutral loop terminal on the switch and the patented three pin shutter mechanism on the sockets for additional safety. Moulded cable lead-ins, captive and backed off terminal screws, wire end stops and in-line terminals have all been designed to ease installation, saving time on site.

Sollysta Twin Socket USB A+C

Moulded

Technical characteristics - USB Charging Ports

Number of Ports	2
Intelligent Connection	Yes
USB Output Power	15.5W
USB Output Voltage	5.0 V d.c.
Standby Power Consumption	≤0.15W
Overload Protection on Output	2.8±0.3A

Technical characteristics - Socket

Standard	BS 1363-2
Voltage Rating	220-240V a.c.
Current Rating	13A per Socket Outlet
Terminal Capacity	3 x 2.5mm ² 3 x 4.0mm ² 2 x 6.0mm ²
Earth	Twin Earth
Switching	Double Pole Switching Mechanism

The latest addition to the range includes a twin port USB-A+C, providing a total maximum of 3.1A charging capacity at 5V d.c.

Our intelligent connection ensures optimum charging performance. The dual USB adapter communicates with the USB device identification circuitry. This allows the USB socket to identify itself as a dedicated charger for the connected USB devices.

The twin socket itself is in common with all Sollysta switched sockets, double pole in construction. A double pole socket switches both the live and the neutral conductors to ensure safe isolation of the plugged in appliance.

In addition the socket features the Sollysta patented 3 pin safety shutter system.

Product Features

Tested by Nemko UK to all relevant clauses of **BS 1363-2:2016 + Annex** and deemed to comply

* only applicable to Moulded products

Sollysta Neutral Loop Terminal

For many years domestic lighting circuits have been connected using the three plate method where the loop terminal is at the ceiling rose.

Today, it is increasingly likely that there is a decorative light fitting or even downlighters fitted in place of a standard pendant. These fittings are rarely provided with a neutral loop terminal.

It has also become popular to make the loop connection at the switch. This has the advantage of the connections being accessible and at a more convenient working height.

However, this leaves the problem of terminating the neutral conductor.

One solution is to connect the neutral to a connector block inside the wall box, which takes up extra space.

Our solution is the Sollysta light switch which has a unique neutral loop terminal, built in.

loop terminal

As can be seen from the diagram the neutrals are looped through the switches with a single line and neutral to each light fitting.

One of the fundamental requirements of the BS 7671 Wiring Regulations is to provide basic protection against electric shock.

Socket outlets have apertures for plug pins and therefore will have a shutter mechanism that prevents access to live parts unless the earth pin is also present and has been inserted first. This however can be either intentionally or inadvertently defeated by inserting something into the earth pin aperture.

Sollysta sockets have a unique patented shutter system that not only requires the earth pin to be inserted first, but the simultaneous insertion of the live and neutral pins as well, before the shutter mechanism is activated.

This enhances safety by making it difficult to defeat the mechanism and therefore reducing the risk of electric shock.

Unique Safety Shutters

Sollysta

Wiring Accessories

In addition to the aesthetics for the home owner and specifier, Sollysta has been designed to make the installation easier for the installer. Terminals designed to face in the same direction with lead-ins for wiring, backed out screws held captive to prevent loss, wire end stops and clear identification all help make the wiring and cabling much easier, helping to save time on site.

01

Terminals

The terminals all face in the same direction, removing the need to rotate the product during installation.

02 Terminal Screws

Terminal screws are supplied in the backed out position to save installation time and are also held captive within the moulding so they won't be lost.

03 Lead-ins

Moulded lead-ins help to guide the driver blade to the screw head.

04 Wire End Stops

A positive wire end stop provides added security of connection.

05 Projection

The range has been designed to offer the shallowest projection possible in the back box, maximising space for cabling.

Maintenance Free Junction Box

See page 55

The Maintenance Free Junction Box provides a secure and maintenance free means of connecting fixed wiring in any indoor application, whether it be under floor applications, between ground and first floor in houses, or where the jointing of cables is used to aid rewiring.

BS 7671 (Wiring Regulations) recognises equipment complying with an appropriate British Standard without further qualification. Therefore, a junction box marked (MF) is identified as a maintenance free accessory, which does not require further inspection, testing or maintenance after installation in a circuit.

The terminals accept and secure solid, stranded or flexible conductors from 0.5mm² to 4mm². Twin and CPC and flexible cords can all be mixed. You then secure the cage clamp terminal using a screwdriver or finger to push down on the push button.

The Maintenance Free junction box is ideal for use in residential and commercial buildings, refurbishments and re-wires, power and lighting circuits and circuits wired in sheathed cables.

The Maintenance Free junction box is unrivalled in today's market. No other junction box provides as many features that allow contractors to comply with the latest wiring regulations.

Screwless Terminations

Tests on these terminals include long-term vibration, shock test, long term connection test, pull out, voltage drop, temperature rise and exposure to corrosive atmospheres

Cable clamps

Cable clamps prevent strain on terminations and prevent exposed unsheathed conductors.

Breakout

The simple breakouts on the base and lid allow you to select your cable entry points.

Recognising that junction boxes are used to supply the connection between fixed wiring and downlighters, we developed a junction box that will help contractors meet the needs of the regulations.

Downlighter Junction Box

See page 55

The J501 is torpedo shaped to fit through a 58mm diameter hole in the ceiling. All the cables are securely clamped and they exit from either end of the junction box. This is in contrast to other junction boxes where the cables are generally not clamped and often exit at different angles, making it hard to push or pull them through the hole without risking damage or loosening the connections.

A loose or disconnected cable is a hidden danger with junction boxes. With an increasing drive for safety, such products have come under close inspection.

Wiring is fast and simple. The J501 fits comfortably in the hand and the cables can be clamped for easier connection. Cabling space is maximised with all the terminals arranged on one side and the upper wall on the lid hinges open 360° for unrestricted access.

For wiring, the three plate terminal style in the box is logical and easy to use and separate terminals for flexible cords and twin and CPC cables help prevent damage to smaller flexible conductors.

During installation all the cables are securely clamped, so there is no strain placed on the terminal connections and no risk of exposed unsheathed conductors. The cable clamps can be reversed to allow either single or double cable entry, which allows up to four flat and one flexible cable to be terminated.

Safety Pendants & Lampholders

See page 56

- 01 Lampholder & Skirt
- 02 Ceiling Rose Cover
- 03 Terminal Safety Cover
- 04 Terminal Plate

Our philosophy is to provide all of our pendants and lampholders with a safety J-slot mechanism which automatically disconnects power at the contacts when the lamp is removed.

This prevents electric shock due to accidental touching of the contacts when changing or installing lamps.

This applies to

Safety Bayonet Cap Cord Grip Lampholders

Safety Straight Batten Lampholders

Safety Access Batten Lampholders

Safety Pendant Sets with Access Ceiling Rose

Safety Terminal Cover clips onto Terminal Plate enclosing live parts.

Additional safety can be achieved with our terminal cover which provides protection against accidental contact with electrical connections.

Safety is ensured with the clipable cover which shrouds all electrical connections whilst allowing removal of the ceiling rose cover for decorating or maintenance.

Wall Switches

Characteristics:

- Unique patented loop terminal allows neutral looping at the switch.
- Complies with BS EN 60669-1:2018, a.c only.
- 'X' rated - No need to derate for fluorescent loads.
- Clear terminal markings: 1-way L1, 2-way L2
- Capacity of each terminal - 2 x 4.0mm² conductors.
- For mounting boxes see selection chart on page 58.
- For multigang switches use of a 25mm mounting box will provide increased wiring space.
- Supplied with M3.5 x 20mm long fixing screws and screw covers.
- Suitable for SBL circuits to a maximum of 100 W SBL

Rotary Push Button Dimmer Switches

Characteristics:

- Quick press for on/off with rotary dimming control.
- 1 or 2 way switching.
- Supplied with M3.5 x 30mm long fixing screws and screw covers.
- Complies with BS EN 60669-2-1 (excluding clause 26 EMC requirements).

Mains Halogen

- Suitable for mains halogen lamps without the need for derating.
- Not suitable for fluorescent, LED or inductive loads.

LED

- Leading edge functionality compatible with many dimmable LED lamps & fittings
- Thermal safety fuse for short circuit protection

Switched & Unswitched Socket Outlets

Characteristics:

- Unique patented three part safety shutter.
- Complies with BS 1363-2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- All terminal screws grouped in-line and upward facing for ease of installation.
- Clear printed and engraved terminal markings.
- Capacity of each terminal: 3 x 4mm² conductors switched & unswitched (for other sized conductors see terminal capacities on page 59).
- **Sockets with USB connections - Warning:** To avoid possible damage to the product or spurious insulation readings, please disconnect the product before carrying out insulation resistance testing.
- **Sockets with USB connections:** USB output: 5V d.c. 3.1A total max.
- For mounting boxes see selection chart on page 58.
- Supplied with M3.5 x 30mm long fixing screws and screw covers.

Cooker Control Unit

Characteristics:

- Complies with BS 4177.
- Switch and socket are double pole.
- Twin earth as standard.
- Main switch is suitable for isolation.
- All terminals are upward facing for ease of installation.
- Clearly printed terminal marking.
- Capacity of terminals: 2 x 6.0mm², 1 x 16.0mm².
- For mounting boxes see selection chart on page 58.
- Supplied with M3.5 x 30mm long fixing screws and screw covers.

Outlet Plates

Characteristics:

- Complies with BS 5733
- Terminal capacity: 20A 2 x 6.0mm², 45A 2 x 10.0mm² conductors
- 20A plate features 2 separate terminals for each of Line, Neutral and Earth so flexible and fixed wiring do not occupy the same terminal.
- Single screw fast fix cable clamp.
- Supplied with M3.5 x 30mm long fixing screws and screw covers.
- 45A features large open brass terminals for ease of installation.
- Protective red washer must be used under cable clamp to prevent damage to cable.

Switched & Unswitched Fused Connection Units (13A)

Characteristics:

- Complies with BS 1363-4.
- Single screw fast fix cable clamp, accommodates up to 2.5mm² flexible cord.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal 2 x 6.0mm² conductors.
- Supplied with M3.5 x 30mm long fixing screws and screw covers.
- For mounting boxes see selection chart on page 58.
- We also offer a bespoke printing service for your individual requirements. Please contact our Estimation Team on 01952 675594 for further details.

Note: For constant 3kW loads not requiring overload protection, consideration should be given to the use of 20A DP switches instead (page 18).

Shaver Socket

Characteristics:

- Complies with BS EN 61558-2-5.
- Shaver socket terminal capacity (to BS6004) 3 x 1.0mm², 2 x 1.5mm², 1 x 2.5mm²
- Designed for use in bathrooms and shower rooms and incorporates a double wound transformer for an earth free supply.
- Designed to supply electric shavers rated 50 VA or less.
- Input 230V a.c. output dual voltage 230V a.c. and 115V a.c. outlets. Rating 20VA on either voltage.
- Primary circuit protected by a self resetting thermal overload device.
- Insertion of shaver plug automatically switches on the transformer.
- Supplied with M3.5 x 30mm long fixing screws and screw covers.

Light Switches

Characteristics:

- Complies with BS EN 60669-1.
- 'X' rated - no need to de-rate for fluorescent loads.
- Earth terminal in base.
- Switch will operate at up to an angle of 45°.
- Pull cords 1.5m long.
- Capacity of each terminal: 2 x 1.5mm² conductors.

Description	Cat ref.
6A Ceiling Switch	
1 Way	WMCS11
2 Way	WMCS12

WMCS3PIF

Fan Isolator Switches

Characteristics:

- Complies with BS EN 60669-2-4.
- Terminal capacity: 3 x 1.5mm².
- Supplied with M3.5 x 30mm long fixing screws and screw covers.

Description	Cat ref.
10A 3 Pole Ceiling Switch	
Printed with Fan Symbol & 'Isolator'	WMCS3PIF
Printed 'Isolator'	WMCS3PI
Printed with Fan Symbol	WMCS3PF

WMCS50N

Shower Switches

Characteristics:

- Complies with BS EN 60669-2-4.
- Rated conditional short circuit current (I_{nc}) 1500A tested with Hager **MTN150** 6kA B Curve MCB.
- Suitable for use with showers up to 11.5kW.
- Position of the contacts shown by flag indicator.
- Supplied with M3.5 x 30mm fixing screws.
- Capacity of each terminal: 1 x 16mm² conductors.

Grid Switches

Characteristics:

- Complies with BS EN 60669-1:2018 switches, BS 5733 fuse carrier.
- Shallowest switch modules which clip in from the front for ease of installation and maintenance.
- Terminal screw can be accessed with modules clipped into frames.
- Frames locate to finished wall level.
- Frames clip together to ease alignment for 6 gang and 8 gang applications.
- 20A Switches suitable for SBL circuits to a maximum of 250W SBL.
- We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

Part M Wiring Accessories

Characteristics:

- Designed to satisfy Buildings Regulations Approved Document M (referred to as Part M)
- All products comply with their relevant British Standards
- Switches have wide rockers and dark face plates for clear visibility and ease of actuation
- Sockets have outboard rockers to ensure correct switching of appliances and dark face plates for ease of identification of switch position
- 10AX Switches Suitable for SBL circuits to a maximum of 100 W SBL
- 20A Switches suitable for SBL circuits to a maximum of 250W SBL
- Grid modules can be found on page 23. Euro modules can be found on page 21.
- WMDP84NGI & WMDP50N* Complies with BS EN 60669-2-4.

Wall Switches Raised Plate

Characteristics:

- Unique patented LOOP terminal to allow neutral looping at the switch.
- Complies with BS EN 60669-1:2018, a.c only.
- 'X' rated - No need to de-rate for fluorescent loads.
- Capacity of each terminal 2 x 4.0mm² conductors.
- 10AX Switches Suitable for SBL circuits to a maximum of 100 W SBL
- For mounting boxes see selection chart on page 58.
- For multi-gang switches, use of a 25mm mounting box will provide increased wiring space.
- Supplied with M3.5 x 20mm long fixing screws.

Socket Outlets Raised Plates

Characteristics:

- Unique patented three part safety shutter.
- Complies with BS 1363 Part 2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal: 3 x 4mm² conductors, switched & unswitched (for other sized conductors see terminal capacities on page 59).
- For mounting boxes see selection chart on page 58.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.
- **Sockets with USB connections - Warning:** To avoid possible damage to the product or spurious insulation readings, please disconnect the product before carrying out insulation resistance testing.
- **Sockets with USB connections:** USB output: 5V d.c. 3.1A total max.
- All decorative USB sockets come with spacer colour matched to insert and 30mm & 20mm screws.

WRSSU83FOBSW

Fused Connection Units Raised Plate

Characteristics:

- Complies with BS 1363-4.
- Single screw fast fix cable clamp accommodates up to 2.5mm² flexible cord.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal 2 x 6.0 mm² conductors.
- For mounting boxes see selection chart on page 58.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

Note: For constant 3kW loads not requiring overload protection, consideration should be given to the use of 20A DP switches instead (page 35).

Flat Plate 50A Double Pole Switch 1 Gang with LED Indicator		
Polished Steel	WFDP50NPSW	WFDP50NPSB
Brushed Steel	WFDP50NBSW	WFDP50NBSB

Shaver Socket Raised Plate

Characteristics:

- Complies with BS EN 61558-2-5.
- Capacity of each terminal 2 x 2.5mm² conductors.
- Designed for use in bath/shower rooms & incorporates a double wound transformer for an earth free supply.
- Designed to supply electric shavers rated 50 VA or less.
- Input 230V a.c. output dual voltage 230V a.c. and 115V a.c. outlets.
- Rating 20VA on either voltage.
- Primary circuit protected by a self resetting thermal overload device.
- Insertion of shaver plug automatically switches on the transformer.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

WRBTMBSW

Telephone & Data Raised Plate

Characteristics:

- BT sockets comply with BS 6312-2.
- Supplied with fitted cable tie.
- Quick connection with insulation displacement terminals.
- Clearly printed terminal marking.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

Metalclad Wall Switches (10A)

Characteristics:

- Unique patented LOOP terminal to allow neutral looping at the switch.
- Complies with BS EN 60669-1:2018, a.c only.
- 'X' rated - No need to de-rate for fluorescent loads.
- Capacity of each terminal 2 x 4.0mm² conductors.
- 10A Switches suitable for SBL circuits to a maximum of 100W SBL.

Metalclad Socket Outlets

Characteristics:

- Unique patented three part safety shutter.
- Complies with BS 1363-2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- Terminal screws grouped in-line and upward facing for ease of installation with clear printed and engraved terminal markings.
- Capacity of each terminal: 5 x 2.5mm² conductors switched; 4 x 2.5mm² unswitched (for other sized conductors see terminal capacities on page 59).
- **Sockets with USB - Warning:** To avoid possible damage to the product or spurious insulation readings, please disconnect the product before carrying out insulation resistance testing.
- **Sockets with USB** - USB output: 5V d.c. 3.1A total max.

Metalclad Fuse Connection Units

Characteristics:

- Complies with BS 1363-4.
- Single screw fast fix cable clamp accommodates up to 2.5mm² flexible cord.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal 2 x 6.0 mm² conductors.

Note: For constant 3kW loads not requiring overload protection, consideration should be given to the use of 20A DP switches instead (page 48).

Grid Switches with LED Indicator - Printed

Characteristics:

- Complies with BS EN 60669-1:2018 switches, BS 5733 fuse carrier.
- Shallowest switch modules which clip in from the front for ease of installation and maintenance.
- Terminal screw can be accessed with modules clipped into frames.
- Frames locate to finished wall level.
- Frames clip together to ease alignment for 6 gang and 8 gang applications.
- Suitable for SBL circuits to a maximum of 250 W SBL
- We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

Metalclad Euro Plates

Characteristics:

- Carrier plates facilitate installation of industry standard modular data outlets.
- Easy to configure for all applications.
- Quick release of modules for maintenance.
- Available as plate only for installation with standard wall box.

Wall Switches

Characteristics:

- IP66 rating conforms to BS EN 60529 : 1992.
- Functional products tested and certified to BS EN 60669-1:2018, a.c. only.
- Robust and rugged enclosures designed to withstand the elements.
- Suitable for SBL circuits to a maximum of 100 W SBL for 10A and 250W SBL for 20AX
- Cable entries: 90 x 90 = 4x20, 1x20 & 1x25

Maintenance Free Junction Box

Characteristics:

- Complies with BS EN 60670-22.
- Suitable for use in inaccessible areas.
- Spring fit terminals do not relax over time.
- Four separate cable terminations per connector.
- Comes complete with incoming and outgoing cable clamps.
- Junction box selection chart see page 61.

J804

Description	Terminal capacity	Pack qty.	Cat ref.

Downlighter Junction Box

Characteristics:

- Comes complete with incoming and outgoing cable clamps to prevent strain on terminations.
- Three plate terminals with separate terminals for flexible cords.
- Complies with BS EN 60670-22.
- Fits through a 58mm diameter hole.
- 3 plate terminal style with captive terminal screws.
- Separate terminals for flexible cords.
- Current rating: 16 Amp.
- Junction box selection chart see page 61.

Traditional Junction Box

Characteristics:

- Complies with BS EN 60670-22.
- Slot terminals are ideal for taking spurs off uncut ring or loop circuit cables.
- Solid machined brass terminals.
- Junction box covers secured by single centre screws.
- Junction box selection chart see page 61.

Junction / Adaptable Box

Characteristics:

- Junction box cover secured by two screws
- Accepts 16mm x 16mm and /or 16mm x 25mm mini-trunking.
- Junction box selection chart see page 61.

Description	Terminal capacity	Pack qty.	Cat ref.
No Terminals	-	10	J701

SEL212

Safety Lampholders

Characteristics:

- Complies with BS EN 7895.
- T2 heat resistance rating: 210°C.
- Automatically disconnect power at the contacts when the lamp is removed.
- 50.8mm fixing centres for non-access versions. Use with mounting blocks **MB326E/MT**.
- Body angle of angled battens set at 30°.
- Access lampholders have integral **RL624** ceiling rose base and heat resisting PVC tails.

Safety Pendants Sets with Access Ceiling Rose

Characteristics:

- Pendant set complies with BS EN 60598-1.
- Capacity of each terminal: 3 x 1.00mm² conductor.
- Barriers between terminals.
- Flexible pendant cord restraining hooks.
- Fixing centres 50.8mm.
- Feet on base to aid mounting on uneven surfaces.
- Three separate knockouts accept 1, 2 or 3 x 1.5mm² conductors.
- Optional halo **RL602**.

Super Access Terminal Bank Type Ceiling Rose

Characteristics:

- Capacity of each terminal: 3 x 1.00mm² conductor
- Common base with 'access' batten lampholders.
- Barriers between terminals.
- Flexible pendant cord restraining hooks.
- Fixing centres 50.8mm.
- Feet on base to aid mounting on uneven surfaces.
- Three separate knockouts accept 1, 2 or 3 x 1.5mm² conductors.
- Optional halo **RL602** (see below)

Description	Dimensions	Pack qty.	Cat ref.
Three Terminals	81 Diameter x 26 (halo = 108mm diameter)	10	RL624

Mounting Blocks

Characteristics:

- Capacity of earth terminal for mounting blocks: 3 x 1.5mm².
- Cable knockout entries: **MB326E/MT** - centrally in base. Four on periphery will accept 16mm x 16mm or 16mm x 25mm mini trunking.

Printed Products

Many of our Sollysta wiring accessories are available with printed options, such as Washing Machine, Dishwasher etc.

For a full list of products generally available from stock please go to www.hager.co.uk/printedproducts

We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

Unique Safety Shutter

Socket outlets have apertures for plug pins and therefore will have a shutter mechanism that prevents access to live parts unless the earth pin is also present and has been inserted first. This however can be either intentionally or inadvertently defeated by inserting something into the earth pin aperture.

All Sollysta sockets have a unique patented three pin shutter system that not only requires the earth pin to be inserted first, but the simultaneous insertion of the live and neutral pins as well, before the shutter mechanism is activated.

This enhances the safety by making it more difficult to defeat the mechanism and therefore reducing the risk of electric shock.

Neutral Loop Terminal

Today it is increasingly likely that there is a decorative light fitting or even downlighters fitted in place of a standard pendant. These fittings are rarely provided with a neutral loop terminal.

It has also become more popular to make the loop connection at the switch. This has the advantage of the connections being accessible and at a more convenient working height.

However, this leaves the problem of terminating the neutral conductor.

One solution is to connect the neutral to a connector block inside the wall box, which takes up extra space. Another is to use the Sollysta light switch which has a unique neutral loop terminal.

The IP rating for all low voltage enclosures up to 1000 V a.c. and 1500 V d.c. is defined in identical fashion by the standards EN 60529 - IEC 529. It comprises the letters IP followed by two character numerals and or additional/ supplementary letters.

The first character numeral indicates the degree of protection provided by the enclosure against access to hazardous parts by preventing or limiting the ingress of a part of the human body or an object held by a person and ingress of solid foreign objects.

The first character numeral:
Protection against foreign objects

IP	Description	
0		Non-protected
1		Protected against solid objects \geq than 50mm
2		Protected against solid objects \geq than 12.5mm
3		Protected against solid objects \geq than 2.5mm
4		Protected against solid objects \geq than 1.0mm
5		Dust-protected
6		Dust-tight

Additional letter (in option)
Protection of people against access to hazardous parts

	Description
A	Protected against access to hazardous parts with the back of the hand
B	Protected against access to hazardous parts with a finger
C	Protected against access to hazardous parts with a tool - ϕ 2.5mm
D	Protected against access to hazardous parts with a wire - ϕ 1mm

The second character numeral indicates the degree of protection provided by the enclosure with respect to harmful effects on the equipment due to the ingress of water. An X signifies that the tests are not applicable to the product.

The second character numeral:
Protection against ingress of water with harmful effects

IP	Description	
0		Non-protected
1		Protected against vertically falling water drops
2		Protected against vertically falling water drops when enclosure tilted up to 15°
3		Protected against spraying water
4		Protected against splashing water
5		Protected against water jets
6		Protected against powerful water jets
7		Protected against the effect of temporary immersion in water
8		Protected against continuous immersion in water

Additional letter (in option)
Specific information on the product

	Description
H	High voltage apparatus
M	Motion during water test
S	Stationary during water test
W	Weather conditions
