

Now Stocking Klik Lighting Connection

Lighting creates an impression. Klik, our lighting connection and control system provides the roots to a buildings lighting system, allowing it to adapt and grow.

Klik 4 Lighting and Connection and Control

From Project To Solution

Klik 4 is a modular plug-in marshalling solution for lighting systems that provides simultaneous mechanical and electrical connection in one click-in action.

Designed for on-load connection & disconnection, Klik 4 allows individual light fittings to be removed or added without affecting other fittings on the circuit.

Safe on-load connection

Luminaires can be connected in seconds in absolute safety, without circuit isolation as all live contacts are inaccessible and the earth connection is made before any other, facilitating a simplified maintenance plan.

Easier

The Klik 4 range is designed to make installation easier on installers. The terminals are larger with raised identification making them simpler for wiring.

Electro Mechanical Connection

All Klik plugs feature a unique plug-in method which achieves a simultaneous mechanical and electrical connection.
