Sollysta Wiring Accessories

Our expansive range of Sollysta Wiring Accessories have been designed from the beginning to be installer friendly, tactile & safe.

Sollysta White Moulded Wiring Accessories

Elegant Functionality

Our Sollysta Wiring Accessories range uses modern design to combine stylish aesthetics and quality without compromising on functionality, reliability or safety.

Sollysta provides a complete range of wiring solutions suited for the residential and commercial markets.

Terminal and Terminal Screws

The terminal screws are supplied in the back and the terminals all face the same direction, removing the need to rotate the product during installation.

Lead-ins & Wire End Stops

Moulded lead-ins help to guide the driver blade to the screw head whilst a positive wire end stop provides added security of connection.

Projection

The range has been designed to offer the shallowest projection possible in the back box, maximising space for cabling.
